

Mobil® Monitor LMS

Mobil Monitor Lubrication Management System (LMS)

Description

Mobil® Monitor LMS is a comprehensive lubrication management program that helps plan maintenance operations, provide predictive models for lubrication planning, and integrate effectively with Mobil Monitor custom software packages.

Mobil Monitor LMS helps companies meet business goals by improving equipment condition monitoring capabilities, maximizing available resources, and eliminating overall maintenance headaches.

Applications

Mobil Monitor LMS is a fully integrated lubrication management solution designed to meet the needs of today's demanding production and maintenance environments.

The program is intended to help improve equipment reliability by focusing on four primary areas:

- Plant Asset Management
- Scheduling of Lubrication and Related Maintenance Tasks
- Work History Tracking
- Management Reporting

Accessible by a variety of user levels, Mobil Monitor LMS provides an easy-to-use, flexible management tracking and reporting system that works toward extending equipment life, minimizing production costs, and ultimately improving bottom line results.

Advantages

- Consultation on the establishment of a Lubrication Management Program
- Establishment of detailed lubrication schedules
- Professional training materials and resources
- Expert support for configuration, set-up, and installation
- Technical support (telephone and e-mail)
- Database structure that supports program growth in proportion to your needs

Specifications	Minimum System Requirements
Product	Mobil® Monitor LMS Software
Operating System	Windows 95 or higher Windows NT 4.0 or above is preferred
Processor (CPU)	Pentium II or higher
Speed	266 MHz or faster
Hard Disc	50 MB or more
Configuration	Mobil Monitor LMS can be installed either on a stand-alone PC or in a network environment*

*A separate client server database engine is required.

Key Service Features

Mobil Monitor LMS software is the next generation companion to the cutting-edge software that Mobil engineers use for analysis of sampling data.

Features include:

- Fully customizable plant asset manager without restrictions on level of detail
- Supports standard maintenance and safety procedures such as lock-out, etc.
- Assists in your compliance with regulatory requirements such as OSHA, EPA, ISO 9000/14000, and QS 9000
- Scheduling flexibility:
 - **By calendar** — elapsed time (“every seven days”) or specific time (“every second Tuesday”)
 - **By meter** — elapsed meter (“every 10,000 miles”) or specific meter value (“at 50,000 hours, regardless of when last performed”)
 - **By operations schedule** — multiple operations periods (before, during, or after scheduled shutdowns, for example)
- Pre-installed Mobil lubricant library, to let users immediately start building lubrication rounds, for routine and shutdown scheduling

Key Service Features (continued)

- Troubleshooting highlighted by department, machine types, and other factors
- Handheld devices (PDA) for paperless work environment (optional)
- Identification of unnecessary expenditures by combining detailed history with a built-in query function
- Complete lubricant and parts tracking, for understanding consumption patterns by equipment, component, and lubricant type
- Complete set of pre-defined tracking reports
- Multi-user level password security
- Ability to attach procedures, photos, URL Web addresses, and diagrams to each facility, piece of equipment, and component
- Tracking of all necessary equipment data, including asset and warranty information
- "Drag-and-drop" duplication of any equipment already entered in the database, including component and lubrication task information
- Addition of lubrication tasks at the facility, equipment, or component level
- Modification, movement, and re-sequencing of equipment and tasks as needed
- Capability to manage multiple databases to separate plants or work locations
- Database merge capability
- SQL-based Report Wizard for designing custom reports
- Network versions available

Installation and Maintenance Fees

Installation and associated annual maintenance fees are based on the number of dedicated workstations and include:

- Lubrication management consultation
- Mobil Monitor LMS software version upgrades
- Telephone and e-mail technical support
- Printed and electronic users training manual
- Electronic tutorial for user certification
- Built-in help function

Technical Support

Support for Mobil Monitor LMS includes:

- Technical support for all your software-related questions at 1-800-99MOBIL or 1-604-984-4328. M-F, 7 a.m. to 8 p.m., EST
- Built-in help function and dedicated e-mail support
- Printed and electronic software user manuals

The technical support desk will help you:

- Get technical assistance for all Mobil Monitor software programs
 - Mobil Monitor Lubrication Management System (LMS)
 - Mobil Monitor Oil Analysis Software (Corporate Network, Maintenance Professional, or Lubrication Technician)
- Tailor the software to your specific requirements
- Find out about system enhancements
- Provide suggestions on how we can improve this service

Order Fulfillment

Contact your Mobil representative to place an order. If you do not have a representative, call 1-800-662-4525, or 1-888-662-4582 in Canada, to reach the Mobil representative for your area.

Policies

The Mobil Monitor LMS process requires a signed Annual Maintenance Agreement. Your Mobil representative will provide this form for your signature.
